Summary

Frontend Developer with 3.3+ years of experience building scalable enterprise web and mobile applications using Angular, TypeScript, Ionic, and modern frontend engineering practices. Specialized in Angular application development, SSR, frontend performance optimization, reusable component architecture, state management, and responsive UI engineering.

Experienced in developing enterprise-scale ERP and workflow management systems with focus on frontend scalability, rendering optimization, modular architecture, and seamless user experience. Hands-on experience with PWAs, NgRx, REST API integration, CI/CD pipelines, and cross-platform mobile application deployment for Android and iOS.

Skilled in AI-assisted development workflows using Cursor AI, GitHub Copilot, and modern developer tools to improve development productivity, debugging efficiency, code quality, and rapid feature delivery.

Technical Skills

Frontend Engineering: Angular 2+, TypeScript, JavaScript (ES6), RxJS, NgRx, AngularJS, HTML5, CSS3, SCSS, Angular Material, PrimeNG, Bootstrap, Responsive UI Development, RESTful API Integration.

Architecture & Performance: SSR, Angular Universal, PWAs, Lazy Loading, Micro Frontend, Module Federation, State Management, Frontend Scalability, Rendering Optimization, Reusable Component Architecture, MVVM Architecture, Cross-browser Compatibility, Agile Methodology.

Mobile Development: Ionic 7/8, Cross-Platform Mobile Development (Android & iOS), Mobile App Deployment, Responsive Design.

Backend & Cloud: Node.js (Basic), Express.js (Basic), AWS (S3, IAM).

DevOps & Tools: Git, GitHub, GitLab, GitLab CI/CD, Docker, Webpack, Babel, Postman, Automated Build & Deployment Pipelines, Cypress, Trello.

AI-Assisted Development: Cursor AI, GitHub Copilot, OpenAI Codex, Claude, Prompt Prompt Engineering, Model Context Protocol (MCP).

Analytics & Testing: Google Analytics, Firebase, GTM, Jasmine, Karma, Web Accessibility (WCAG Guidelines)

Experience

Frontend Developer | Angular, SSR & AI-Assisted Development

March 2023 – Present

Rssquarz Tech Solutions Pvt. Ltd., Pune

- Led migration of enterprise Angular application from Angular 10 to Angular 17 with SSR implementation, improving SEO visibility, rendering performance, and initial page load experience.
- Engineered scalable enterprise web applications, PWAs, and cross-platform mobile applications using Angular, Ionic, and modern frontend architecture practices.
- Developed reusable and modular UI components to improve frontend maintainability, scalability, and development efficiency across multiple modules.
- Implemented NgRx state management and reactive programming patterns using RxJS for predictable state synchronization in complex enterprise workflows.
- Optimized frontend performance and reduced initial bundle size through lazy loading, SSR optimization, code splitting, and Angular performance engineering techniques.
- Integrated secure payment gateways, authentication systems, and RESTful APIs for real-time transactions and seamless data synchronization.
- Designed and sustained GitLab CI/CD pipelines for automated build, deployment, and release workflows across test and production environments.
- Collaborated with backend teams and stakeholders to improve API scalability, application stability, deployment efficiency, and production reliability.
- Published and maintained production-grade mobile applications on Google Play Store and Apple App Store using Ionic framework.
- Leveraged AI-assisted development tools such as Cursor AI and GitHub Copilot for debugging, rapid prototyping, code optimization, and productivity enhancement.

Projects

Richa Graphics — Enterprise Workflow Platform (Angular Web + Ionic Mobile)

- Engineered and maintained a large-scale enterprise operations platform consisting of 50+ interconnected modules including Orders, Task Management, Installation, Delivery, Vendors, Vehicles, Inventory, CMS, and Role Administration with complex workflow orchestration, real-time status transitions, and REST API integrations.
- Architected a scalable Angular frontend using lazy-loaded feature modules, reusable shared libraries, centralized HTTP/auth/session layers, dynamic permission-based routing, and multilingual localization support to handle complex business workflows and high-volume operational data.
- Developed advanced reactive form systems with deeply nested parent-child order hierarchies, dynamic validations, conditional rendering, role-driven UI access, and optimized state synchronization across multiple modules and user roles.
- Implemented frontend performance optimizations including lazy loading, route-level code splitting, OnPush change detection, RxJS optimization, API response caching, debounced search/filter operations, and bundle size improvements to enhance application scalability and runtime efficiency.
- Improved engineering and deployment quality by introducing curated unit testing with Karma/Jasmine, GitLab-based headless CI pipelines, reusable environment configuration strategies, and structured release workflows for multiple deployment environments.
- Built and deployed a cross-platform field installer mobile application using Ionic 7 and Angular 16 integrated with the same enterprise backend ecosystem for workforce operations, installation tracking, and field service management.

BuildersNetwork (Android & iOS)

- Developed and maintained a large-scale cross-platform real estate platform with property discovery, advanced search/filtering, real-time chat, push notifications, geolocation-based services, and role-based user workflows across web and mobile ecosystems.
- Migrated the application architecture from Angular 10 PWA to Angular 17 with Server-Side Rendering (SSR), improving initial load performance, SEO visibility, rendering efficiency, hydration behavior, and overall application scalability.
- Implemented frontend performance optimizations including lazy loading, route-level code splitting, optimized change detection, API request optimization, image/resource optimization, and caching strategies to improve Core Web Vitals and mobile responsiveness.
- Engineered secure authentication/session workflows, dynamic filtering systems, reusable component architecture, and scalable API integration layers for handling high-volume real estate data and user interactions.
- Built, deployed, and maintained production-ready Android and iOS applications integrated with the same backend ecosystem, including Play Store and App Store release management and production issue resolution.

Apna Grahak (Enterprise Business Management Platform)

- Developed and enhanced a large-scale enterprise business management platform covering Sales, Purchase, Inventory, Customer Management, Order Processing, Reporting, User Roles, and operational CMS workflows for end-to-end business operations.
- Architected scalable Angular modules with reusable component-driven architecture, complex reactive forms, dynamic data tables, advanced filtering/search capabilities, and permission-based workflow management across multiple operational domains.
- Implemented centralized state management using NgRx and RxJS for handling high-volume asynchronous data flows, cross-module state synchronization, caching strategies, and reactive business workflows.
- Improved frontend performance and user experience through lazy loading, optimized rendering strategies, reusable shared services, debounced API interactions, and efficient change detection patterns for data-intensive admin operations.
- Collaborated on scalable REST API integrations, business process automation workflows, and production-grade UI/UX improvements to support enterprise-level operational management.

Tech Stack: Angular 12, NgRx, RxJS, REST APIs, Angular Material, Bootstrap.

Education

Integrated Master of Computer Application (MCA)

R.C. Patel I.M.R.D, Shirpur with CGPA: 9.64

2018 – 2023

Achievements

- **Best Performer (2023–24)** – for outstanding contribution and technical excellence in Frontend Development.
- Secured **2nd Rank** in CSI Project Presentation, recognized for technical innovation and effective project delivery.
